Mr. Bob Walker American Program Bureau 59 Temple Flace Boston, Mass. 02111

Dear Bob.

I believe it was Fet with whem I discussed the brochure you want me to get up. She was to send me a draft of those things you'd like included, so I'd know, from your experience, what should be. As soon as I get this I will make a draft, with layout, and send it for your approval and suggestions. I have already discussed it with my artist. Would you also, please, include a few samples from those you now have? He asks for them.

Many of you people seem to believe slides are desireable. Therefore, in addition to those I had, I am having some made of new material and I will have an ample supply, should you think they should be used or should an audience want them. These will be of people and of evidence.

have been thinking of this since meeting you. I think it is not only possible but desireable to talk of things entirely new, entirely unknown. I am loaded with such material from my limited editions and will use them. his can broaden your possibilities to include medical and legal groups. I have completed two parts of the three-part study of the autopsy. All of this is new. It is material, for example, Mark Lane could not have used.

Ferhaps the best current possibilities deal with the King/Ray case. Here again I have written the only book on that evidence, and I have made the only analysis of that evidence. This might have special appeal to some black and liberal groups, especially at colleges. I can talk about the King murder entirely, with no reference to JFK's.

Sinceraly.

Harold Beisberg
